## SERVICES

### AFTER SALES ASSISTANCE HOTLINE WARRANTY

Our team of engineers is available to assist you by phone, team viewer or any other method that suits you best.

### INSTALLATION & TRAINING

Our team organises turnkey station installation projects. This includes measurement system supply and testing, WNRs, civil engineering and data transmission between the sites and the central facilities.

An adapted training plan is designed for each project, taking the trainees' knowledge and skill level into account.

### MAINTENANCE

Our team is highly experienced in operating stations, particularly in remote areas with special accesses. We can provide a permanent presence or carry out regular preventive and corrective maintenance visits to maintain the stations in perfect working order.
